

LEVER GREASE GUN 1/8"

VIBLU

Designed for the practical and efficient application of grease to machinery, tools and mechanical equipment, this grease gun is compatible with standard cartridges or bulk grease. As such, it enables maintenance work to be conducted in a simple and controlled manner, contributing to the proper functioning and durability of the components. With a capacity of 400g and an output pressure of up to 6000psi, it ensures an even distribution of the grease, even in hard-to-reach areas or systems that require higher pressure. It is therefore suitable for use in workshops, industrial maintenance, agriculture, and general mechanical applications. Its robust construction and ergonomic design ensure greater comfort during use, guaranteeing safe handling during frequent lubrication operations.

Key features

- **Efficient application of grease;**
- **Compatible with standard cartridges or bulk grease;**
- **Efficiency guaranteed by an output pressure of up to 6000psi;**
- **400g capacity, suitable for maintenance work;**
- **Versatile use, ideal for workshops, industry, and agriculture;**
- **Ergonomic design, ensuring comfortable handling;**
- **Sturdy construction, suitable for frequent use.**

Specifications

Capacity	**400 g**
Fixing thread	**1/8’’**
Discharge pressure	**6000 psi**
