

SOUTHERN TYPE HOE

VI0275

The VITO South-type hoe, made from tempered steel, is built for demanding agricultural tasks requiring strength, durability and reliable soil penetration. Its wide, reinforced blade allows effective cutting, loosening and cultivation of soil, as well as weed removal. The reinforced ring socket ensures a stable handle connection, improving control and reducing user fatigue during prolonged work.

Key features

- > Tempered steel construction for long-lasting durability
- > Wide blade ideal for soil cutting and cultivation
- > Strong and reliable for intensive agricultural use
- > Reinforced ring socket for secure handle attachment
- > Excellent force transfer and ergonomic performance
- > Suitable for land preparation, weeding and soil breaking

Specifications

Diameter	37 mm
Material	Hardened steel
Handle	VI4015
Number (Nº)	0
Size	140 x 185 mm
Weight	0,85 kg
