

## BLACK ANNEALED WIRE BWG18

### VIAR18

BWG18 annealed wire is a versatile material widely used in professional applications. The annealing process provides high flexibility, making handling easier and allowing secure tying. It is suitable for construction work, particularly for tying reinforcement bars, fixing elements, formwork tasks and other technical applications. It is also used in agricultural, industrial and general-purpose applications.

#### Key features

- High flexibility for easy handling
- Suitable for tying and fastening
- Use in construction, agriculture and industry

#### Specifications

Diameter	<b>1,22 mm</b>
Roll	<b>45 Kg</b>
