

WINTER JACKET WITH HOOD

VIBLIL

The winter jacket with hood is designed for professionals performing outdoor activities in environments exposed to cold, moisture and adverse weather conditions. Made from 100% polyester with PVC coating, it provides effective waterproof protection against rain and wind, helping to keep the body dry during work. The integrated hood offers additional protection in demanding weather conditions, while the elastic waist enhances fit and helps retain body heat. It features a zip closure reinforced with velcro, ensuring a secure and practical fastening. Multiple front pockets allow for convenient storage of frequently used tools and accessories. Suitable for construction, maintenance, logistics, industrial applications and general outdoor work during cold weather periods.

Key features

- > Waterproof PVC-coated polyester material
- > Effective protection against rain, wind and cold
- > Integrated hood for additional coverage
- > Elastic waist for improved fit
- > Zip closure with velcro reinforcement
- > Multiple functional front pockets
