

PARTICULATE RESPIRATORS WITH VALVE FFP2 - 3 UN

VIC821VP2

The VITO FFP2 NR D Mask with Valve is designed to protect the respiratory system against dust, fine particles and aerosols of solid or liquid origin. With a protection class of FFP2, it is suitable for environments with up to 10 x TLV contaminant concentration, ensuring high filtration efficiency. The exhalation valve minimizes heat and moisture buildup, offering enhanced comfort during extended wear. An adjustable nose clip and latex-free elastic straps ensure a snug and comfortable fit. Certified to EN 149:2001+A1:2009, it is ideal for use in construction, industry, agriculture and workshops.

Key features

- > FFP2 NR D protection against solid and liquid aerosols.
- > Exhalation valve for improved breathing comfort.
- > Adjustable nose clip for secure fit.
- > Latex-free elastic straps.
- > Certified EN 149:2001+A1:2009.

Specifications

Adjustable latex-free elastic bands	Yes
Adjustable nose clip	Yes
Certification	EN 149:2001+A1:2009
Maximum level of use	10 x TLV
Protection class	FFP1 NR D
