

PADDED VEST ALPHA VICOAAL

The Alpha padded vest is designed for professionals who require thermal protection and comfort during outdoor work. Manufactured with high-quality technical fabrics, it combines a durable and breathable outer layer with efficient thermal insulation, providing protection against cold wind and rain without restricting movement. The DWR (Durable Water Repellent) technology allows water to bead off the fabric surface, keeping the wearer dry even in adverse weather conditions. Features include multiple functional pockets, durable fastenings, chin protector, elastic side panels for improved fit and reflective bands on the front and back for enhanced visibility. Suitable for demanding outdoor professional activities.
