

COMBINED BENCH GRINDER 250W, 150MM WHEEL AND SANDING BELT VIESM150CL

VITO's Combined Bench Grinder combines a belt sander, perfect for removing wood or metal, with a grinding wheel, suitable for precision work and detailed finishing. The belt sander function of this bench grinder is perfect for perfecting the finish of wood or metal pieces, as well as facilitating the grinding of these materials. The grinding wheel, on the other hand, is better suited for precision work and detailed finishing on smaller surfaces, allowing for fine adjustments and a more refined finish on the materials being worked on. This versatility makes it easy to switch between fast grinding with the belt and precise finishing with the wheel, adapting to the different requirements of each project quickly and efficiently. The tool is equipped with a 150mm diameter and 16mm thick grinding wheel, guaranteeing precision in both tool sharpening and detailed finishing. The 12.7mm diameter bore ensures compatibility with a wide range of accessories, providing flexibility in different types of work. With a G80/P80 grit, the bench grinder offers medium-precision grinding and sharpening, guaranteeing consistent results. The dust-protected On/Off switch increases the tool's durability and safety. In addition, the model operates with an S2 duty cycle, allowing up to 30 minutes of continuous use before a break to prevent overheating. For greater precision, the grinder includes an integrated light, offering extra lighting in the work area, crucial for detailed tasks. Equipped with rubber feet, the equipment guarantees safe and stable support during use.

Key features

- > Versatile: Belt sander for large surfaces and disc sander for precise finishing;
- > Dust Protection;
- > S2 Duty Cycle: Allows continuous use for up to 30 minutes before needing a break, preventing overheating.
- > Integrated Lighting;
- > Easy to Change Accessories: Changing the grinding wheel and sanding belt is quick and easy;
- > Total Stability: Rubber feet for secure, vibration-free support.

Specifications

Dimension of the sandpaper	50 x 686 mm
Duty cycle	S2 (30min)
Grinding wheel hole diameter	12,7 mm
Grinding wheel outer diameter	150 mm
Grinding wheel thickness	16 mm
Grit	G80 / P80
No-load Speed	2950 rpm
On/off switch	Yes - protected against dust
Rated power	250 W
Sound power level (LWA)	102 dB
