

5-WAY CONNECTOR
VIT5

This 5-outlet connection with 1/2" and 1.1/4" inlet/outlet is a versatile solution for systems requiring multiple connections. Ideal for distributing flow in up to five directions, it is widely used in high-efficiency hydraulic systems, such as irrigation networks, water supply, and industrial applications. With a robust construction (made of brass) and excellent pressure resistance, this "T" ensures durability and reliable performance under various conditions.
