

GRAFTING SHEARS

VITENX

Grafting shears with high carbon steel blade, developed for all plants, effective on fruit trees, vegetables, nurseries, flowers, allow you to perform precise and fast cuts, thus simplifying the process of cutting useless leaves and branches.

Key features

- > Developed for the grafting of all plants, effective on fruit trees, vegetables, nurseries, flowers, etc.
- > Replaceable blades (O-cut, U-cut and V-cut, each blade with two cutting points);
- > They allow you to make precise and quick cuts, thus simplifying the process of cutting away useless leaves and twigs;
- > High carbon steel blade (more resistant to chipping and deformation).

Specifications
